CommunionHub React Developer Assignment

Objective

Build a simple two-page **React web app** with the following pages:

- **Home Page** – Brief introduction about the Communion App.
- **Event Listing Page** – Users can view, filter, and add events.

Task Description

Page 1: Home Page (Landing Page)

Welcome Message about the Communion App.
Brief Description (e.g., "Connecting people of all faiths through events and community support").
Header with a logo & navigation links (*Home, Events, About*).
Hero Section:

- **Title:** "Connecting People Across Faiths & Interests"
- **Short Description** about the app's purpose.
- **Call-to-Action (CTA) button:** "Explore Events" → Redirects to Events Page.

Page 2: Event Listing Page

Display List of Events (Title, Date, Location, Description).
Filter Events by Category (e.g., Religious, Social, Charity).
Add New Events via a simple form (*Title, Date, Category*).

Live Demo:

Host the project on **Vercel** or **Netlify**.

Submission Guidelines

Deadline: March 11, 2025 *(3-5 days)*
Submission Format: GitHub repository link.
Responsive UI: Works on **both Desktop & Mobile**.
Animated UI with smooth transitions.

Evaluation Criteria

✔️ **Clean & Readable Code**
✔️ **Functional & Responsive UI**
✔️ **Proper Use of React.js**
